Missing Tools (2)

Real Device Testing - automation

CI/CD Pipeline - automation

Executive Recommendations to 100% 2

High Priority +7 Impact Points

Implement Automated CI/CD Pipeline

Add Fastlane integration for App Store and Google Play deployment

- ✓ Setup Fastlane configuration
- ✓ Configure code signing
- ✓ Add automated store deployment
- ✓ Implement rollback capability

Global Standard: DevOps Best Practices / DORA Metrics

Medium Priority +6 Impact Points

Add Real Device Testing Integration

Integrate AWS Device Farm or Firebase Test Lab for comprehensive testing

- ✓ Setup device farm integration
- ✓ Configure automated test runs
- ✓ Add test result analytics

Global Standard: ISTQB / IEEE 829

Cutting-Edge Global Tools 2

GitHub Actions + Fastlane

Vendor: GitHub + Fastlane | 92% of mobile teams

DEVOPS +10

Industry-leading CI/CD pipeline for mobile app automation

Benefits:

- Automated App Store & Play Store deployment
- Code signing automation
- Beta distribution with TestFlight/Firebase

Integration Steps:

1. Configure Fastlane lanes
2. Setup GitHub Actions workflows
3. Configure secrets and certificates

DORA Metrics DevSecOps ISO 27001

BrowserStack + AWS Device Farm

TESTING +8

Vendor: BrowserStack / AWS | 85% of enterprise mobile teams

Real device testing on 3000+ devices for comprehensive coverage

Benefits:

- Test on real iOS and Android devices
- Parallel test execution
- Visual regression testing

Integration Steps:

1. Setup BrowserStack account
2. Configure test frameworks (Appium/XCUITest)
3. Integrate with CI/CD pipeline

ISTQB IEEE 829 ISO 25010
